

Achref Lemjid is an Assistant professor and researcher at ESPRIT. He holds a PhD degree in mathematics from faculty of science of Tunis El Manar. He started his professional career in 2011, as contractual assistant professor. He moved to Sweden in 2016, where he was a researcher at Linnaeus university, Växjö.

Dr. Achref is guest lecturer at Bergische Universität Wuppertal, Germany and Linnaeus university, Sweden. He has been teaching courses at all levels from the large mathematical fields of analysis, probability theory and statistics, stochastic process, algebra, and Financial mathematical modeling. The field of research of Dr. Achref is Stochastic Analysis and applications, Quantum field theory, Quantum probability and White Noise analysis.

He participated in many international conferences and workshop at Linnaeus University Växjö, Bergische Universität Wuppertal, Toulouse III- Paul Sabatier University, Kulliyyah of science international islamic university Malaysia, Technische Universität Kaiserslautern, in Germany and Loughborough University in England.

Dr. Achref has published 5 scientific papers in international journals.
